

**REMARKS**

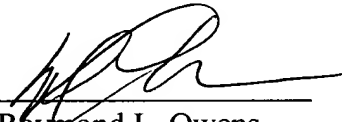

Claim 1 has been amended to more clearly set forth the invention. It is now clear that there are at least two different image bearing products requiring different resolution images. After a product is selected at a first location, the resolution requirement is sent from the service provider to the first location. At the first location, the image is converted to the required resolution and sent to the service provider, where the selected product is produced. The term "characterized by" has been added.

Claims 2 and 8 have been cancelled.

It is believed that these changes now make the claims clear and definite and, if there are any problems with these changes, Applicants' attorney would appreciate a telephone call.

Respectfully submitted,
